

Eastern Shore Superintendents

**Interagency Committee for Public  
School Construction (IAC)**

- School district requests for school construction funding have always exceeded the amount budgeted
- Funding has been decreased to \$250 million and local requests exceed \$600 million.
- Increased funding will be required each year to address the backlog of construction projects and the health and safety concerns documented by the last IAC School Facilities Survey
- Rising construction costs also necessitates adjustments to the IAC formula
- More flexible guidelines should be developed for use of the Aging School Fund (ASF)
